PROFILE

Third-year Computer Science student at National University, specializing in Digital Forensics. I build web apps, data tools and games, from scrapers in Python to full-stack React apps on Supabase, alongside a background in customer support where I mentored junior agents. Open to internships, full-time roles and freelance work.

EDUCATION

BS Computer Science, specializing in Digital Forensics 3rd Year – Present
National University, Manila
Building real projects alongside coursework, from a production-style web scraper to a full-stack barangay services app.

Senior High School 2019 – 2022
NU Nazareth School

High School 2016 – 2019
Quezon City Academy

PROJECTS

e-Barangay React · TanStack Start · Supabase · Tailwind CSS
A web portal for Barangay 902. Residents register, request documents, report community problems with photos and an e-signature, and send feedback. Admins verify residents, post announcements, and turn requests into print-ready certificates and clearances.

Web Data Extraction Python · asyncio · Playwright · SQLite
An asynchronous crawler built to scrape responsibly. It fetches pages over HTTP and falls back to a headless browser for JavaScript-heavy sites, follows robots.txt and per-domain rate limits, retries with backoff, resumes interrupted crawls from checkpoints, and exports to JSON, CSV or SQLite.

Portfolio JavaScript · TypeScript · React · WebGL · GSAP
This responsive portfolio, with scroll animations, WebGL effects and full keyboard accessibility, deployed on GitHub Pages.

Northstar ATM Banking System Java · Swing
A desktop banking simulation with PIN login, balance inquiry, deposits, withdrawals and transfers, transaction receipts, and filtered history with CSV statement export.

Digital Forensics Final Project Python
Generated simulated login evidence, then cleaned the malformed records and engineered features for analysis.

EXPERIENCE

Senior Agent, T-Mobile Account

Sep 2023 – Dec 2024

Alorica Centris, Quezon City

- Resolved T-Mobile (US) customer account and service concerns over the phone, and documented every case clearly.
- Worked to quality and handle-time standards in a fast-paced environment.
- Focused fully on customer needs, tone and emotions, with clear, concise and professional communication.
- Mentored and supported junior agents, sharing customer engagement techniques to grow their service and communication quality.

Kitchen Staff

Sep 2021 – Jan 2026

Charles Chicken and Belly, Quezon City

- Maintained sanitary food preparation areas, following health and safety regulations.
- Set up workstations, cooked to order, and kept dishes to a high standard of presentation.

COMPETITIONS

Meralco IDOL Hackathon

Participant

Built and pitched a tech solution to a real challenge from the country's largest power distributor, against a hackathon deadline.

SKILLS

Languages	Python, Java, JavaScript, TypeScript, C++, HTML, CSS
Web and data	React, TanStack Start, Supabase, MongoDB, SQLite, Tailwind CSS, Playwright, GSAP
Tools	Git, VS Code, Cursor, Figma, Notion, Godot
Professional	Technical communication, mentoring, customer support, documentation
